

LAGOM PHARMATECH

The company Lagom Pharmatech s.r.o. is a Czech pharmaceutical company that focuses on the production and processing of quality and standardized medicinal substances - cannabis for medical use, which serves as a basis for the preparation of individually prepared pharmaceutical products in pharmacies, as well as API raw materials for pharmaceutical manufacturing companies for its further processing.

LPT holds a licence for the distribution of pharmaceuticals, handling of narcotic drugs and preparations, a certificate of good manufacturing practice (GMP) in the production of pharmaceutical substances and a licence for the cultivation of cannabis plants for medicinal use.

Studies have shown that medical cannabis has a positive effect on a number of diseases:

- Chronic pain (neuropathic)
- Appetite, weight loss and debilitation due to cancer, Hepatitis C or HIV/AIDS
- Sclerosis Multiplex
- Nausea and vomiting associated with chemotherapy or radiotherapy
- Glaucoma
- Gilles de la Tourette syndrome
- Epilepsy

Our production

The years of experience of the company's qualified staff, combined with the use of most advanced technology and equipment, is a guarantee of quality to ensure highly standardized production of medical cannabis and the production of medical substances.

The cultivation process

The actual cultivation process of the plants is provided in modern growing facilities.

The rooms are controlled and monitored for temperature, humidity, air conditioning and plant lighting.

This ensures standardized, stable and repeatable production.

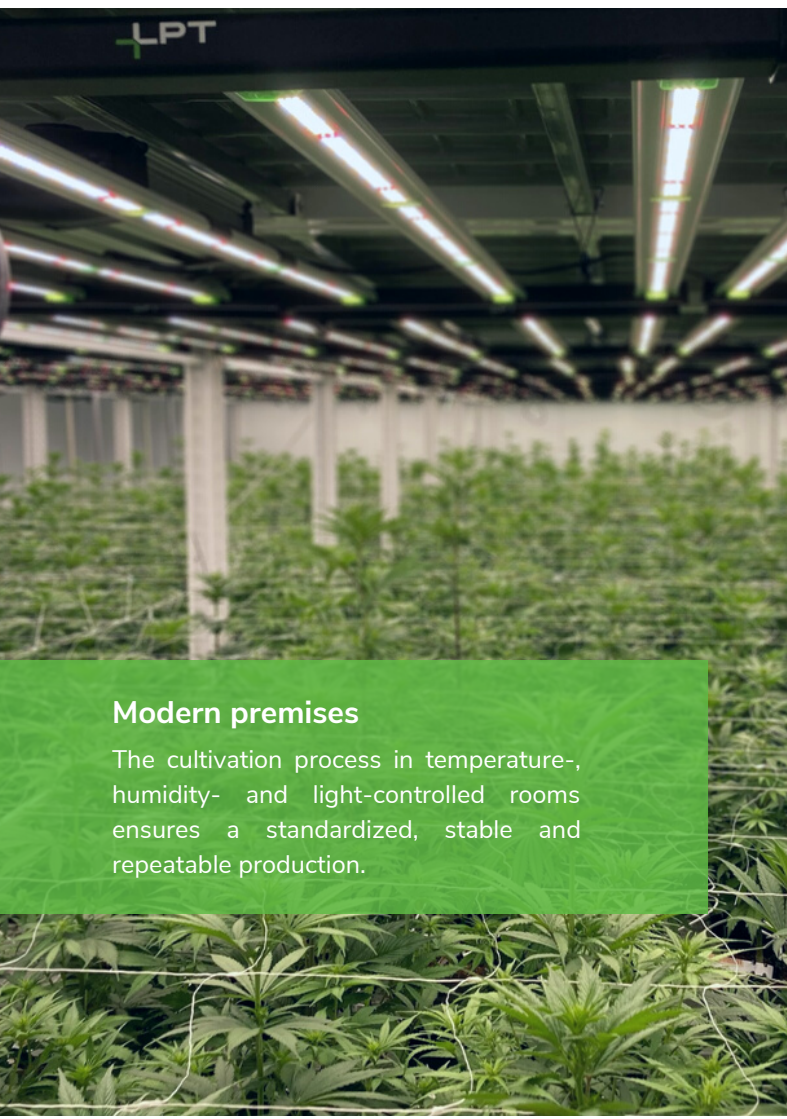

Microbiological safety

After the processing and drying of cannabis flowers for medicinal use, LPT provides, as part of the primary packaging, radiation treatment of the produced medicinal substance to eliminate potential microbial load with subsequent testing in cooperation with a certified laboratory for microbial safety, absence of heavy metals and accurate detection of the content of active substances (Δ THCA and Δ CBD).

The manufacturing processes ensure the declared minimum durability of the finished packages of the drug substance.

LPT as a partner

With its cultivation and production capacities, our company ensures coverage of demand on the Czech market and is a reliable partner in ensuring the supply of all required certified strains of cannabis for medicinal use to our business partners abroad.

Modern premises

The cultivation process in temperature-, humidity- and light-controlled rooms ensures a standardized, stable and repeatable production.

Development of the company LPT

Lagom Pharmatech s.r.o. applies its experience in contacts with the general professional and scientific public. It ensures qualified, continuous, regular professional and expert development of its team of employees.

As part of the planned development, the company will use its own laboratory facilities for analysis and plans to produce medicinal cannabis extract for medical use, including other forms of the final product, such as softgels, suppositories, hard capsules, etc., all under the above-mentioned certification and quality assurance regime.
